

Assai DMS 12

Built for the Way Projects Really Work

Projects only move as fast as their information. When drawings, documents, and reviews are easy to find and simple to share, progress follows. Assai DMS 12 is built to support that flow, giving teams a faster, clearer, more connected way to keep work moving.

Why You'll Feel the Difference

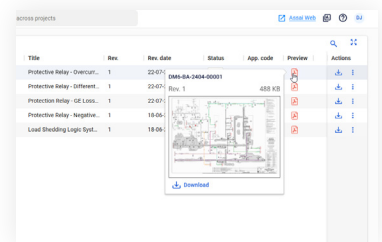

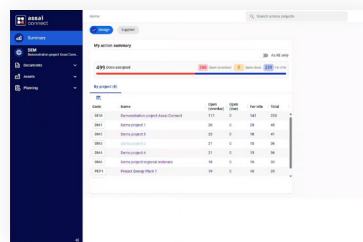

- Fewer delays from missing files
- Faster, more predictable reviews
- Every team working from one source of truth

The Result

- More predictable handovers
- Fewer stalled reviews
- Cleaner audit trails and clearer ownership
- Better alignment across teams and disciplines

Assai Connect the New Core of Assai DMS

Assai Connect introduces a modern, intuitive interface built for speed and focus. Navigation feels natural and search responds instantly. You can switch between Assai Web and Connect with no migration or retraining.

What you will notice:

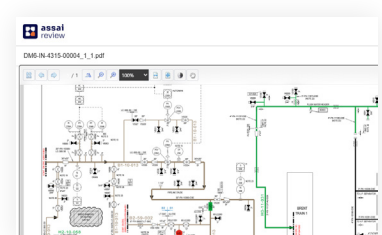

- Navigation that feels natural and effortless
- Fewer clicks to reach key actions
- A unified workspace that adapts to any screen

The same trusted system, now sharper and quicker, designed for people.

Assai ReView - Collaboration That Flows

Assai ReView brings document collaboration into the platform. Users can markup, comment, compare, and approve directly in the browser. No plugins and no version confusion.

Teams close reviews faster and keep communication clear.

What's new in Assai DMS

Assai Connect

- Inbox delegation with full audit visibility
- New document, discipline, and company trees
- Improved cross project search with advanced filters
- First version of the planning module with work packages
- Package search with revision level insight
- Redesigned document and revision detail screens
- Direct links to document detail
- Faster clipboard handling for bulk checks

Assai ReView

- Modern interface for reviewing and marking up documents
- Smoother performance for large files
- Clearer annotation and commenting workflow
- Layout aligned with Assai Connect for consistency
 - Support for upcoming features such as stamps and comparison

Performance Gains

- Faster review cycles
- Better system responsiveness
- More predictable handovers

System Improvements

- Custom transmittal templates with the new designer
- Automated handover indicators for document types
- Latest revision indicators in Admin and Portal uploads
- More flexible workflow email notifications
- Extended API endpoints for transmittals, files, and queries
- Improved error messaging and UI consistency
- Support for read only licenses
- Extended project code and title lengths
